

Toutes les mesures du monde !

"Une référence pour les étudiants et les chercheurs"

LA RECHERCHE

F. Cardarelli, Université Paul Sabatier, Toulouse

Scientific Unit Conversion Practical Guide to Metrication

1996. XV, 456 pp. 187 figs., Softcover 187 FF, ISBN 3-540-76022-9

" If you tire of flicking through piles of textbooks looking for the formulas for converting noggins into litres or foot-pound-force per hour into megawatts, do not despair. Chuck out the lot and buy **SCIENTIFIC UNIT CONVERSION** by François Cardarelli which claims to contain every scientific unit ever used - and a reply card for you to let the author know if he's missed one out. All weights, volumes, powers, areas, field strengths - you name it, it's here. Related units are tabulated together for easy interconversion and, most importantly, into SI units.

A gem for engineers, scientists, historians, journalists..."
